*INDUSTRIAL CAPACITY*  
***COMMERCIAL SALES***  
*INNOVATIVE DESIGN*

***INNOVATIVE QUALITY SOLUTIONS***  
*INNOVATIVE QUALITY SOLUTIONS*

## ***SURGE BINS***

- Designed to be permanently or temporarily set up most anywhere
- 150 bu. capacity or 250 bu. with available side wall extensions
- Adjustable legs allow clearance for seed treater
- Full open top for easy filling. A roll tarp is available
- Other standard features include rack and pinion slide gate, site glasses and exterior ladder
- Available with NTEP or Weights and Measures Canada approved legal for trade scale

## MINI SCALE TOWER

### CONVEY-ALL® CONTINUOUS FLOW MINI SCALE TOWER

- NTEP approved legal for trade in both indoor and outdoor installations.
- Reduces weigh and treating time by over 40%.
- 2000 bu./hr. capacity.
- Can be used with any dry, flowable product.
- Ideal for seed treating lines
- Computer controlled, simply enter the weight of seed required and the Mini Scale Tower delivers a continuous flow of weighed seed to the seed treater

Basic seed treating systems are manual and, as the name suggests, offer limited options. However, systems, while manual and somewhat more labour-intensive, are an economical way to help achieve seed treatment coverage.

#### Features and Benefits:

- \*Rotary seed wheel controls positive seed delivery.
- \*MIST-O-MATIC® atomizer for improved treatment-to-seed coverage, does not require any lubrication.
- \*Variable speed drum control provides maximum blending efficiency and easily accommodates different seed types.
- \*Drum lift bar design helps ensure homogeneous treatment-to-seed coverage. Lift bar design, combined with drum speed control, provides gentle tumbling and reduces seed damage.
- \*Adjustable stand accommodates conveyor hoppers and height limitations.

Also available, are more automated commercial systems that increase throughput capacity and ease of operation.

Automated commercial systems are available by speaking to your Convey-All corporate representative.

- \*Based on model Bayer RH2000 Basic 48" Drum Seed Treating System

## ***BULK SYSTEMS***

- In plant and storage yard systems
- Capacities to match your exact requirements
- Complete custom design, fabrication, installation and after sales service available
- Systems can be manual, completely automated or anything in between
- Seed treating and other systems can be incorporated
- Conveyors reduce the risk of seed damage
- Conveyors reduce the risk of cross contamination
- Ideal for bulk seed plants and more
- Components and systems also available in stainless steel

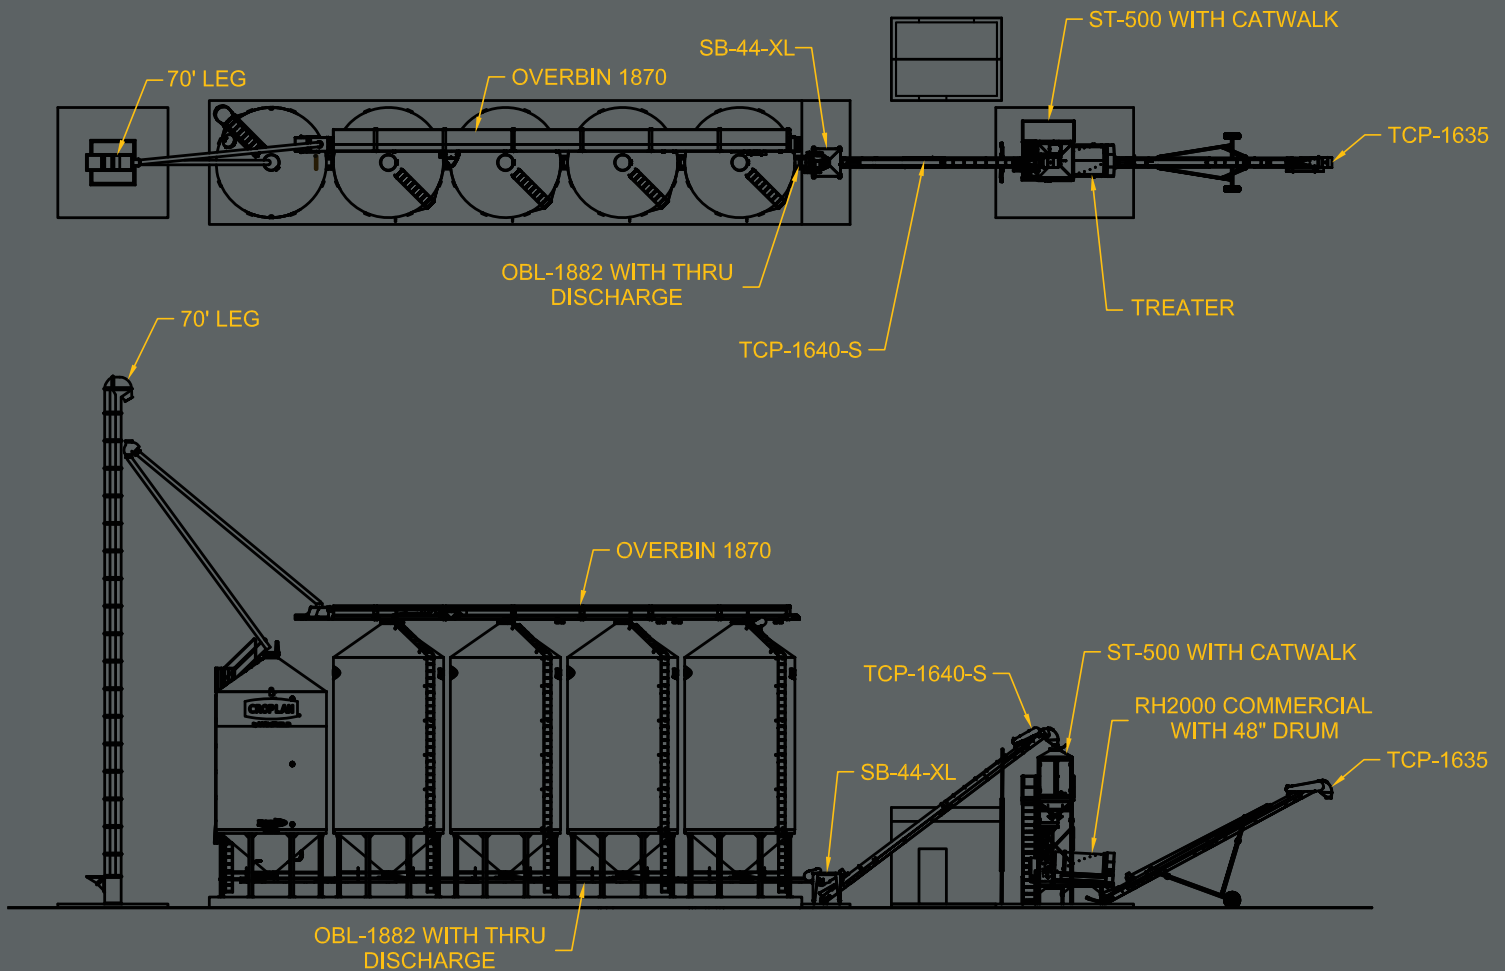

*Part of a rail car loading facility.*

Conveying product from hoppers or flat bottom storage. Conveying product to the plant. Conveying product within the plant and conveying product for bagging, loading or back to storage. Convey-All can custom design and manufacture to meet your exact requirements.

Put the Convey-All® design team  
to work for you.
